Dear incoming 7<sup>th</sup> and 8<sup>th</sup> grade parents,

Now that the current academic year has come to a close and we look forward to summer, we also look forward to the upcoming year. It has been determined that all eighth grade students will be taking algebra during the upcoming academic year. It is requested that all students consider purchasing a TI-84 calculator. The cost can range from \$125.00 and up. Look for the sales over the summer. This machine will be used often throughout the current academic year on into college. It is suggested that parents consider obtaining the optional insurance plan offered at the time of purchase due to accidents. Please be advised that there will be a considerable amount of homework for class. (On average 30 to 40 minutes four times a week depending on the type of lesson).

I would like to also inform parents that additional work assignments found on the computer/chromebook may also be required. I look forward to working with your sons and daughters in the upcoming school year. I promise, they will be challenged.

Respectfully,

Mr. Houle
